Conclusion

01

Project Introduction

Event ticket booking website

Introduce

1

Build a website that allows users to access event ticket purchases online.

2

Support organizers to easily manage events, invoices,...

3

Build a website that allows administrators to manage accounts

Outstanding features

Statistical

Event statistics,
revenue statistics,...

Search

Search for events

Review

Evaluate the event
after it ends

Payment

Event payment by
PayPal and VNPay

Management

Manage data such as
events, accounts,
invoices, etc.

Email service

Get quick event updates
via email.

02

Technology used in the project

Các công nghệ sử dụng

ReactJS
Front-end library

Spring Boot
Java Framework

mongoDB

Mongodb
Database

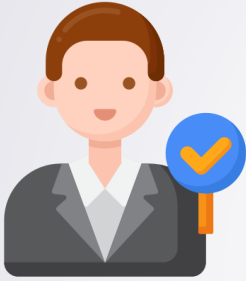

OPENAI API
Chatbot

Functions by role

GUEST

CUSTOMER

ORGANIZATION

ADMIN SYSTEM

1. Customer

- Login
- Login with google account
- Register
- Edit account personal information
- Buy tickets
- View list of purchased tickets
- Manage list of favorite events
- Follow organizers
- Rate events
- ...

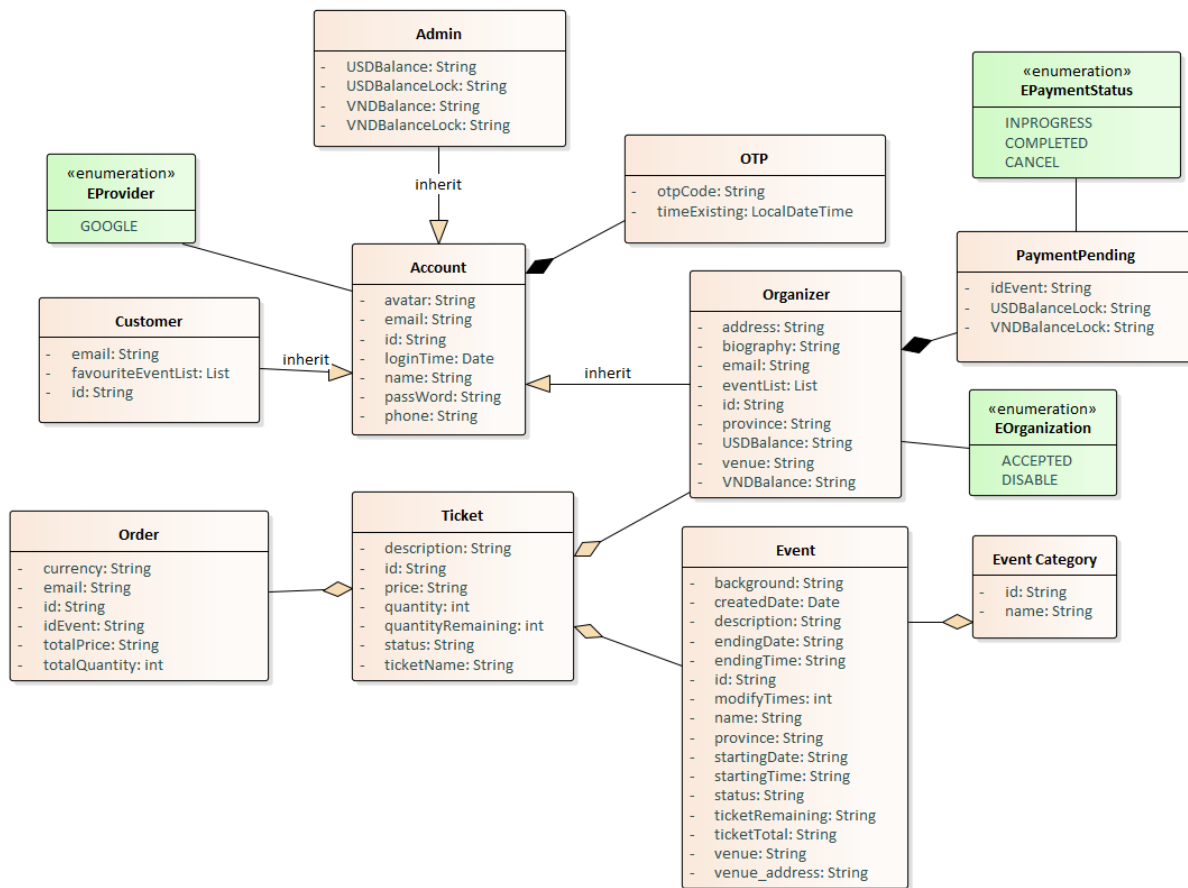

2. Organizer

- Login
- Edit personal account information
- Manage events
- Manage ticket categories
- Manage orders
- Export excel file from order/event list
- Sales statistics based on day/week/month

3. System administration

- Login
- Edit account personal information
- Manage list of customer and organizer accounts
- Approve/reject accounts to become organizers
- Account count
- Revenue statistics

Demo Application

05

Conclusion

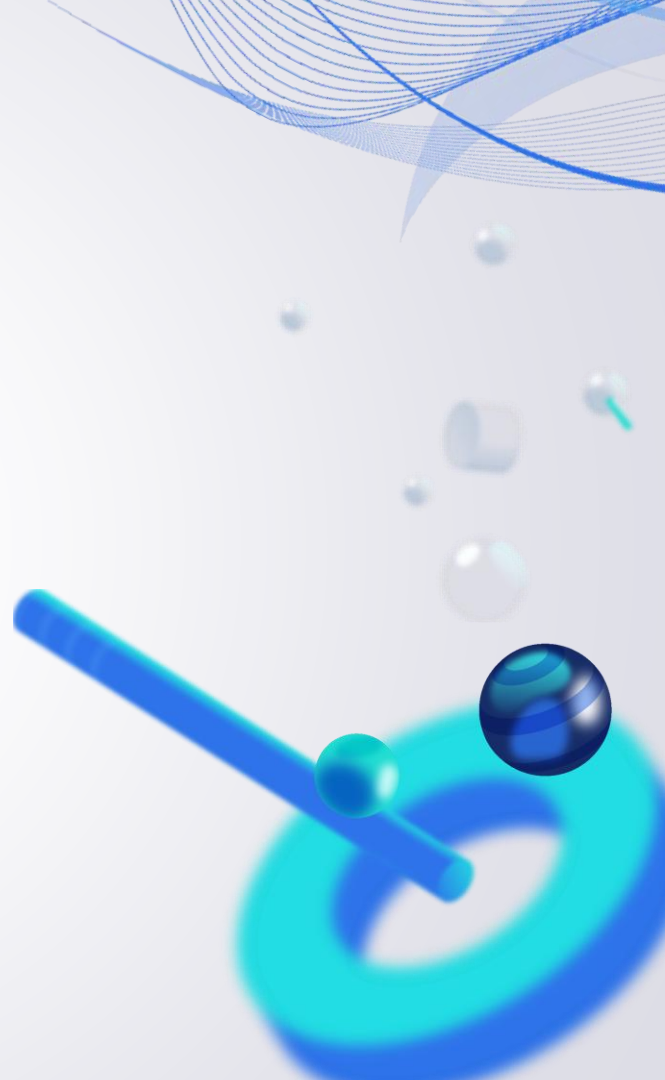

Advantage

- **Intuitive, user-friendly interface**

The application is divided into 2 interface parts: Customer interface and organizer/admin interface. Easy to operate functions.

- **Easy to maintain and expand**

Splitting the interface into 2 parts makes it easier to expand the project, saving development time.

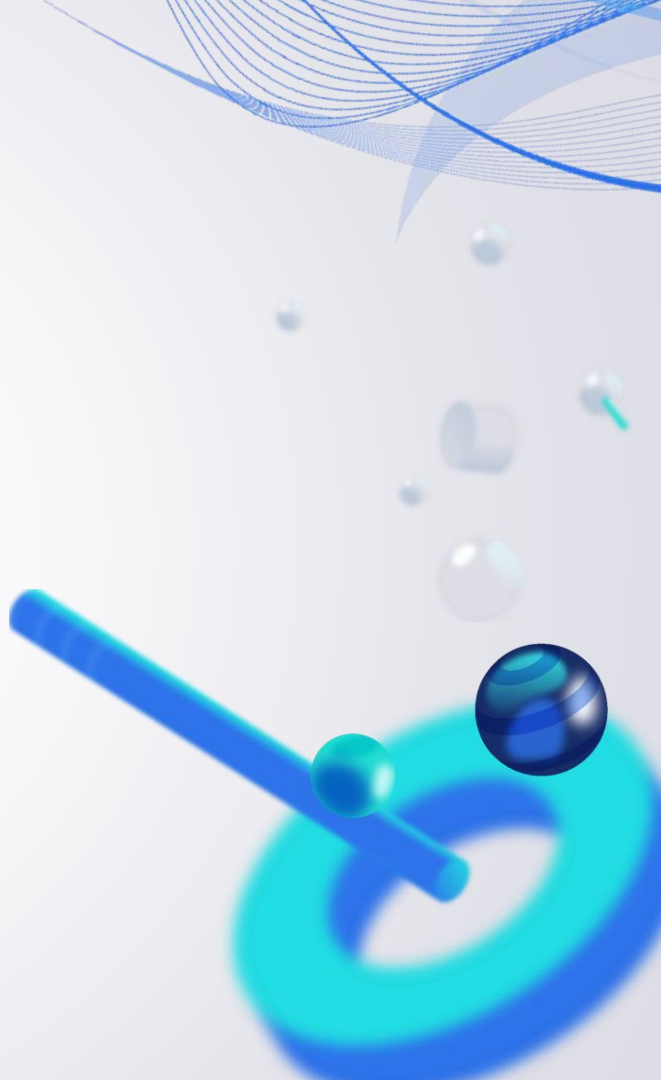

Disadvantages

- **Email service is still down**

Due to the use of 3rd party libraries, the execution of mail related functions sometimes encounters errors.

- **Security risks.**

Development direction

- Ensuring security and safety:
Protect users' personal and payment information.
- Build event check-in ticket verification page and manage ongoing.

Abstract blue line art in the top left corner, consisting of several overlapping, curved, and intersecting lines that create a sense of motion and depth.

**Thanks for
listening!**
